
BUILDING PRODUCT INFORMATION SHEET

Hot rolled structural steel plate
POSCO

Class 1

Building Product Information Sheet

Product name (include the brand name):

Hot rolled structural steel Plate

Product description and its intended use (measurements, materials, usage):

Structural steel is steel material of various shapes and grades used in construction applications. It is manufactured to the requirements of a structural steel standard.

Key technical specifications

Manufacturing standard: AS/NZS 3678: 2016

Section designations: Plate

Grade: G300S0, L0, L15, L20, L30
 G350S0, L0, L15, L20, L30
 G400L0, L15

Product identifier (if applicable):

170702 and 190705

(This could be a Global Trade Item Number (GTIN) or quick response code (QR code), or any other distinguishable part/model number or identifier.)

Place of manufacture: Aotearoa New Zealand Overseas

Legal and trading name of the manufacturer(s):

POSCO

Address for service:

STREET NAME 6261, Donghaean-ro, Nam gu SUBURB Pohang-si, Gyeongsangbuk-do

CITY, COUNTRY South Korea POSTCODE

Relevant Building Code clauses:

B1 Structure: Performance clauses B1.3.1 and B1.3.2
 B2 Durability: Performance clause B2.3.1 (a)
 F2 Hazardous Building Materials: Performance clause F2.3.1

Statement on how the building product is expected to contribute to compliance:

B1 Structure: AS/NZS 3678:2016 plate is a structural steel standard referenced in design standards NZS 3404: 1997 and AS/NZS 2327: 2017. These material design standards are cited as verification methods in B1/VM1.

B2 Durability: The methodologies for designing structural steel components to comply with the building code durability provisions are presented in the cited Technical Specification TS 3404: 2018 (B2/AS1)

F2 Hazardous Building Materials: Structural steel is a stable material that does not emit any harmful gas, liquid or solid particles.

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

**Limitations on the use of the building product:**

B1 Structure: Structural steel shall only be used in construction projects when subject to specific engineering design by a suitably qualified engineer to the requirements of NZS 3404: 1997 or AS/NZS 2327: 2017. Furthermore, the fabrication of structural steel plate and sections into structural steelwork components shall be in accordance with the requirements of AS/NZS 5131: 2016. This fabrication and erection standard is cited as a verification method in B1/VM1.

B2 Durability: Structural steel used in building works shall be subject to durability design by a suitably qualified designer to the requirements of TS 3404: 2018.

Design requirements that would support the appropriate use of the building product:

See limitations of on the use of the building product section above.

Installation requirements *(also provide link to the product installation guide):*

The site installation of fabricated structural steel components shall be in accordance with the requirements of the design engineer's construction specification and those of AS/NZS 5131: 2016.

Maintenance requirements *(also provide link to the product maintenance guide):*

The maintenance requirements shall be as per the building consent documentation and any project specific maintenance schedule produced by a suitably qualified design professional.

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?:

Yes No

If yes, description of the warning or ban under section 26:

Version:

00000002

Date:

2 | 8 | 1 | 2 | 2 | 3
